Off-Grid Solar DC Lighting Systems

Solar Powered Workshop/Shed lights
Solar Powered Horse Barn
Solar Powered Hunting Cabins
Customized Solutions

Solar electricity, produced by photovoltaic's (PV), is a proven means of generating electricity from the sun, and it's not just for high-tech houses anymore. Whether you want to be more "green" in your electrical use on the farm, you have a remote location without electricity, or you want something to supplement your electrical source, solar power could be your answer.

We deliver fully functional systems that can be installed anywhere in the world. Our systems offer measurable value and reduce risk. Our focus guarantees that you get consultants capable of understanding and addressing your needs. All of our solutions are designed to reduce support costs as well as improve the function ability of the space. Our service provides;

1. Site Survey - Planning and Layout
2. Discuss the customer's needs and wants.
3. Power needs assessment.
4. System Component Selection
5. Integration and testing of the system prior to installation or shipping.
6. Follow on tech support based on customers needs.

CSRA Technology can design a custom system for your particular needs. Please contact us at (706) 592-1522.
